

Limbo

Safety Instructions

1. Be sure that there is plenty of clearance between the player and spectators.
2. Keep spectators clear from the sides and back of canvas to prevent them from being struck by a deflected or errant throw.
3. If using game outdoors, it is strongly suggested that you use sandbags on either side of the bottom supports.
4. NEVER USE THE GAME IN STRONG WINDS OR LIGHTENING!
5. Use caution when setting up or taking down the game. The sections of tubing can come apart and fall down causing injury.

Assembly Instructions

1. Select a level area to operate game with plenty of room to allow for a line to form.
2. Assemble framework, per sketch. (Be sure to tighten down the fittings using the small bolts on them if applicable.)
3. Attach canvas to the framework using the Velcro straps.
4. Put clips on the tubing behind the canvas on either side. These support the bamboo rod and are adjusted as the Limbo progresses.
5. If using game outdoors, it is strongly suggested that you use sandbags on either side of the bottom supports.
6. Never fold up canvas wet. Always allow to dry thoroughly first.
